Quality Equipment and Exceptional Office Designs

Spring/Summer 2024 / Volume 37 / No. 116

What business are we in?

Ross Orthodontic has been specializing in the orthodontic environment since 1981. We help maximize space, increase efficiency, and create a smooth workflow. From the design phase to the manufacture to the installation of the operatory equipment, and the customer service we at Ross are specialists in your environment.

In 1981 the Ross family purchased Mastercraft Dental Company. Our goal was to produce the highest-quality equipment at an affordable price.

In 1983 the company name was changed and Ross Orthodontic was started. We dedicated ourselves to improving the orthodontic environment. Ross is one of the only manufacturer's dedicated to orthodontics and the only manufacturer providing design.

Lead by Robert Ross and his two sons, Joseph and Peter, the company has spent almost a half century perfecting its designs and manufacturing of chairs and delivery systems to thousands of satisfied customers.

In 2014, Joseph succeeded Robert as president of Ross, continuing our legacy of building state-of-the-art equipment, all designed to increase your productivity, and more importantly, your profitability. Robert continues to be part of Ross as its' CEO along with his 60 years of experience.

We are constantly working to keep our equipment ahead of the current industry trends and strive to maintain the best quality equipment that will stand the test of time.

Whether you are a recent grad or a seasoned orthodontist, we can help to maximize your potential and increase your profits. We see our customers as fellow business owners and we strive to give them the best equipment, knowledge and customer service in the world of orthodontics. Ross Orthodontic is your source for innovative design and equipment at factory direct prices. Our family at Ross Orthodontic looks forward to helping grow your orthodontic practice and enhance your success.
